

Please amend the present application as follows:

Specification

The following is a copy of Applicant's specification that identifies language being added with underlining ("____") and language being deleted with strikethrough ("—") or brackets ("[[]]"), as is applicable:

Page 13, Paragraph 45.

The PSP receives the high performance file from the designer location over the connection 122. This file is submitted to a PSP preflight module in_step 124. This marks the traditional beginning of PSP prepress operations. These prepress operations, as discussed above, take much time and effort and diminish the efficiency of the PSP. Under the present invention, the prepress efforts at the PSP are minimized. While the print job has already been preflighted at the designer location, it is submitted to a PSP preflight to further ensure that the file is ready to print at the commercial printer.
